Biogenic Dental Laboratory

We are Now Fabricating Ultaire™ AKP Metal Free Partial

The next generation of partial dentures has arrived and is now being fabricated by Biogenic Dental Laboratory. Ultaire™ AKP metal free partial frameworks are fabricated using a high performance polymer developed by Solvay Dental 360™ a division of Solvay Specialty Polymers.

Digitally designed and milled from a solid block (Dentivera™ milling disc) of this innovative high-performance polymer, Ultaire™ AKP brings a new level of fit and biocompatibility to removable partial dentures. With these partial dentures fabricated by Biogenic, [Dentists will find:](#)

Biocompatibility - monomer free and a great choice for patients with metal sensitivity.

Aesthetics - tooth colored polymer

Heat Resistance - resists temperatures up to 300°C

Flexural Strength - 148 MPa

Elastic Modulus - 2500 MPa

Charpy Impact - 10.2 kJ/m² post-conditioning

Ultaire AKP RPD frames have been successfully fabricated for [Kennedy Classes I, II and III](#).

What patients will like:

No Metal - means no metallic taste in the patient's mouth

Aesthetics - no visible metal, tooth colored

Light Weight - more comfortable than heavier metal partials.

Bone-like Properties - improved fit which may help limit bone loss.

Biocompatibility - metal and monomer free for sensitive patients.

Contact us today for more information or to schedule fabrication of your first 100% Metal-free Ultaire™ AKP High Performance Polymer partial denture.

Exceptional Service

Crunch time and your case just has to be in your office? Call the girls in the Biogenic's Shipping & Receiving Department. Office Manager Laurie Klein as well as Melissa Shephard and Lauri Kimball will make sure your shipping needs are taken care of.

Tech Tips & Techniques

Replace those scanner tips to maintain accuracy and consistency! Manufacturers recommend that you replace your scanner tip after about 150 autoclave cycles.

It is also vital that you routinely calibrate your scanner. A little preventative maintenance will help ensure the consistency and accuracy of your scanner and the restorations we fabricate from your scan files.

Proceeds to Benefit a Dental Residency Scholarship at MVHS (St. Lukes)

Tom was a member of the Biogenic Family for nearly 30 years where he worked tirelessly forging successful relationships between Dentists and our Laboratory. To the many dentists who knew Tommy, he was far more than a laboratory representative, he was a friend and partner to all he worked with. Tom Forsythe lost his long courageous battle with cancer on December 17, 2015. We could think of no greater tribute to Tommy than to combine his love of golf and the dental community while supporting a scholarship with this event.
